## I. ABOUT THE PRIVATE CAPITAL ACCESS (PCA) INDEX

The Pepperdine Private Capital Access Index (PCA) is a quarterly indicator produced by Pepperdine Graziadio Business School with the support of Dun \& Bradstreet. The index is designed to measure the demand for, activity, and health of the private capital markets. The purpose of the PCA Index is to gauge the demand of small and medium-sized businesses for financing needs, the level of accessibility of private capital, and the transparency and efficiency of private financing markets.

## About Pepperdine Private Capital Markets Project

The Pepperdine Private Capital Markets Project at the Graziadio School is the first simultaneous, comprehensive, and on-going investigation of the major private capital market segments. The research seeks to understand the true cost of private capital across market types and the investment expectations of privately-held business owners; providing lenders, investors and the businesses that depend on them with critical data to make optimal investment and financing decisions, and better determine where the opportunities to create lasting economic value may be realized.
